**LIBRARY ORIENTATION PROJECT**  
**Searching in Destiny**

**Search for the following titles in Destiny. Write the complete call number for each one.**

1) *Nickel and Dimed* \_\_\_\_\_

2) *The Boy Who Invented Television* \_\_\_\_\_

3) *Ghostopolis* \_\_\_\_\_

4) *Halt's Peril* \_\_\_\_\_

5) *Masters of Illusion* \_\_\_\_\_

6) **Write your famous person's name (spell it correctly!):** \_\_\_\_\_

**Search for that person in Destiny.**

One of your sources for this orientation project will be an article about your famous person found in a print **reference** book. Look for the line right above the results that says "Sort by Relevance". Click on the arrow, and change that to "Sort by Call Number." On that same line, click on "Show All" to the right. Scroll down in the results until you find the titles that have **call numbers beginning with REF**. They will be grouped together--count how many of them there are.

7) What is the total number of reference titles in the search results? \_\_\_\_\_

Select **one** of those reference books that does include an article about **your** person. Don't just write down any of the titles—first verify that your person **is** in the book by clicking on **Details** and **looking for the yellow highlighting** (for example, **George Washington** must be highlighted—NOT **George** Martin and Henry **Washington**). Write down the title and complete call number of that reference book.
